Wolf at the Table by Adam Rapp (March 19)

“*Wolf at the Table* follows the five Larkin siblings in Elmira, New York starting in the 1940s into the present, each with their own struggles in facing the life they have chosen or has been forced upon them. The special ‘love you in spite of your actions’ relationship between siblings is tested and reaffirmed over the dinner table over the decades. Several ‘didn’t see that coming’ twists keeps the story from becoming maudlin or predictable. A good read for anyone who has—and continues to—deal with a far flung family.”
